SUMMARY

Full-Stack Developer experienced in building scalable and production-ready applications using React.js, Next.js, Node.js, and MongoDB. Strong foundation in **Data Structures and Algorithms** using C++ and **OOP**, with expertise in REST APIs, authentication (JWT), and database design. Seeking a **Software Developer/SDE** role to contribute to scalable architecture, backend systems, and product innovation.

EDUCATION

National Institute of Technology, Andhra Pradesh	2022 – 2026
Bachelor of Technology in Electronics & Communication Engineering	CGPA: 8.54/10

EXPERIENCE

South Bihar Power Distribution Company Limited (SBPDCL) Summer Intern – Full Stack Developer	May 2025 – June 2025
- Engaged in on-site, in-plant training at SBPDCL's IT Cell, under the supervision of the IT Manager (SCADA), contributing to the development of a production-ready Car Marketplace Platform. 🔗 - Built the application using Next.js, Supabase, Clerk, and ShadCn UI, featuring 100+ car listings, real-time booking workflows, and dealership dashboards. - Implemented AI integration via Gemini 1.5 Flash API for AI-based car-detail extraction and deployed the mobile-responsive app on Vercel with secure and responsive functionality.	CERTIFICATE
Indian Institute of Technology, Bhubaneswar Winter Intern (Remote)	Dec 2024 – Jan 2025
- Worked remotely on a Microsoft-supported research project under the Academic Partnership Grant 2024, focused on personalized travel planning using leveraging geospatial data. - Processed and cleaned 1,000+ travel datasets, improving annotation accuracy and structuring data for destination ranking and itinerary insights. - Developed rule-based itinerary generation patterns (3-day, 5-day, and 7-day) aligned with user budget, travel location, and preference constraints.	CERTIFICATE

PROJECTS

Realtime ChatApp React, Socket.IO, Node.js, MongoDB	March 2025 – May 2025
- Engineered a real-time messaging platform supporting group and private chats, file sharing, and online presence tracking. - Integrated JWT authentication, ensuring secure access with sub-150 ms latency across all devices.	LINK
BookStore App MERN Stack, Tailwind CSS	Jan 2025 – Feb 2025
- Constructed a digital bookstore featuring 250+ books across 15+ categories with search and filtering capability. - Integrated backend services to enable seamless book management and enabled user login with encrypted credentials.	LINK
Portfolio Website Next.js, TypeScript, TailwindCSS, EmailJS	Feb 2025 – March 2025
- Designed a personal portfolio with animated timeline, showcasing 5+ projects, education, and tech stack. - Integrated EmailJS-powered form with real-time feedback, toast notifications, and success/error handling.	LINK

SKILLS

Languages	C++, Python, SQL, JavaScript, Java (Beginner)
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive UI/UX
Backend	Node.js, Express.js, REST API Development, Authentication & Authorization (JWT)
Databases	MongoDB, PostgreSQL (Beginner)
Developer Tools & Libraries	Git, GitHub, Postman, Vercel, Socket.io, Shadcn UI, Prisma, NumPy, Pandas
Coursework	Data Structures & Algorithms, DBMS (NPTEL), Computer Networks, OOP, Operating Systems (NPTEL), Machine Learning
Soft Skills	Problem Solving, Analytical Thinking, Team Collaboration, Clear Communication

ACHIEVEMENTS / CERTIFICATIONS

Top 10 Finalist – Inspira 24-Hour Hackathon 2025 Competitive Programmer – Leetcode and GeeksforGeeks	LINK
- Built an AI-powered Fake News Detector using MobileBERT deployed with a browser plugin. - Managed both frontend and backend development, and successfully embedded the trained ML model into the project. - Solved 500+ Data Structures and Algorithms problems across 10+ algorithmic topics, including Graph Theory, Dynamic Programming, and Greedy Algorithms.
